

# *Penn Valley Constructors, Inc.*

Coleman Suzuki's new 8,000 square foot body shop includes a state of the art paint bay called the Future Cure Millennium, featured below. The Future Cure booth features a unique airflow design that filters air in one end of the booth and out the opposite end. Another important element is a horizontal lighting system which allows the painter to avoid light blockage while painting.

A bright and efficient service area accommodates 10 cars.

The new showroom awaiting display vehicles.
