The Land Instruments building is situated on a 5-acre site. The two-story structural steel building has walls consisting of brick and dryvit. The clear-story front foyer has a barrel vault standing seam roof and interior brick veneer walls.

The center of the building is an open two-story courtyard with exposed aggregate patio and walkway which provides natural light to the interior spaces of the corporate offices.

Interior finishes include quarry tile floor, radius metal ceilings, custom millwork and casework.

Special mechanical systems include 36 zone variable air volume HVAC system, specialty piping and process gases.
